INTRODUCING FROZEN
GREEN CHICKPEAS

PRODUCT OF THE USA

History.

At Fresh Nature, we live at the crossroads where tradition and innovation intersect. Beginning as a small family farm dating back over four generations in the Pacific Northwest, we have transformed from general commodity producers into a vertically integrated production company pushing the boundaries for how chickpeas are taken to market. Fresh green chickpeas have long been known as a seasonal delicacy throughout the world, and Fresh Nature has emerged as the first company in North America to bring these fresh picked, young green chickpeas to market in an frozen format. We grow, mechanically harvest and shell, then IQF process our green chickpeas. This allows us to not only provide year round supply but also lock in the vibrant bright green color and maximize nutritional value, making green chickpeas the newest superfood available to consumers around the globe.

President & 4th Generation Farmer

HOW WE TAKE

(Common Chickpea)

TRADITION

TO

INNOVATION

Common Chickpeas are:

- Harvested Dry
- Rehydrated in Sodium Water
- Dull in Color
- Bland in Flavor

(Common Chickpea's Hip Younger Brother)

Green Chickpeas are:

- ♣ Harvested Young and Fresh
- ♣ Full of All-Natural Moisture
- ♣ Bright and Vibrant in Color
- ♣ Perfectly Sweet with a Nutty Crunch

The Proof is in the Product

WHAT IF THE U.S. HAD OUR VERY OWN SUPER FOOD GROWN RIGHT HERE ON OUR OWN SOIL?

Welcome Green Chickpeas to the ring to take on and challenge the super food status quo.
So what kind of punch does this little green guy pack?

Features & Benefits:

- ♣ High in fiber, antioxidants, folate & iron
- ♣ A great source of plant-based protein, 5g per ½ cup serving
- ♣ Only 90 calories per ½ cup serving and with no cholesterol
- ♣ All Natural & Non-GMO
- ♣ Allergen Free, Gluten Free & Kosher Certified
- ♣ Grown using sustainable farming practices

With year round availability, green chickpeas are an exciting & healthy choice for plant forward thinkers!

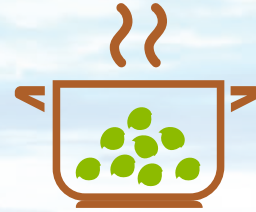

How we do it.

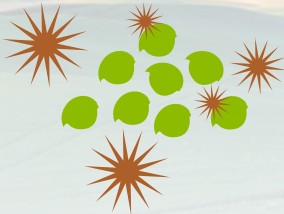

Fresh Pods

Shelled

Blanched

Flash Frozen

Multiple Products

Prepared & Packaged

Capacity.

With our patented growing, harvesting and processing methods we are the first and only farm in North America supplying fresh green chickpea products with year round availability! But that doesn't mean we are a small batch niche producer. We can't keep this greatness to ourselves, we are ready with the production capacity to serve the nations.

GREEN CHICKPEAS

Fresh Nature Foods's mission is to produce safe food using natural, earth-friendly and environmentally sustainable methods.

Chickpeas are great for crop rotations as they help reduce the carbon footprint by conserving valuable natural resources such as water and building the soil back up, which is commonly left depleted after other crops.
